Paul,

Thank you. One question, if Terminix is closed how will you get the cylinder? Are they just closed because they are only open on certain days or are they closed because of the incident?

Richard

Loading port is St. Thomas, USVI Still trying to get the #s but Terminix is closed and there's no contact info, their phone goes into voice mail. We're still working on the #s and should have them sometime today. Not sure we'll know where it came from in PR, recordkeeping is almost as sloppy as their application technique!

Paul,

Thank you. We need to know the name of the Loading Port. Also have you been able to get those EPA Reg and Est numbers from the cylinder? Also any information on who in PR supplied the product to Terminix.

Good morning Rich,

If you would kindly send the new cylinder label and shipping docs to the following EPA person on St. Thomas he will deliver it to the response personnel currently working to decon the effected condo units.

Thanks very much,

Paul
